

Recycling and Waste Disposal

Did you know at SurfacePrep we offer recycling of abrasives?

We are committed to diverting abrasives from landfill and giving them a new lease of life. This brings recycling and environmental issues to the forefront of our business.

As a licensed waste broker/ carrier, we work with a range of recycling plants and customers in order to find a variety of additional uses for your spent products. We are able to collect most materials, enabling your

company to be more cost effective and environmentally friendly.

At SurfacePrep we can broker the collection, recycling and disposal of most spent media. This include: fused aluminas, bauxite, plastics, glass and many more.

We can arrange for your waste material to be collected in any volume. This can range from as little as one pallet or a full truck load. Collections can take place from once a week/month or on an ad hoc basis. We realise that your waste needs can change due to a variety of factors.

The recycling process offers significant cost savings when compared to standard waste disposal and landfill options.

Why should you recycle?

With sustainability and the circular economy at the centre of many businesses priorities, avoiding landfill is key.

What can we recycle?

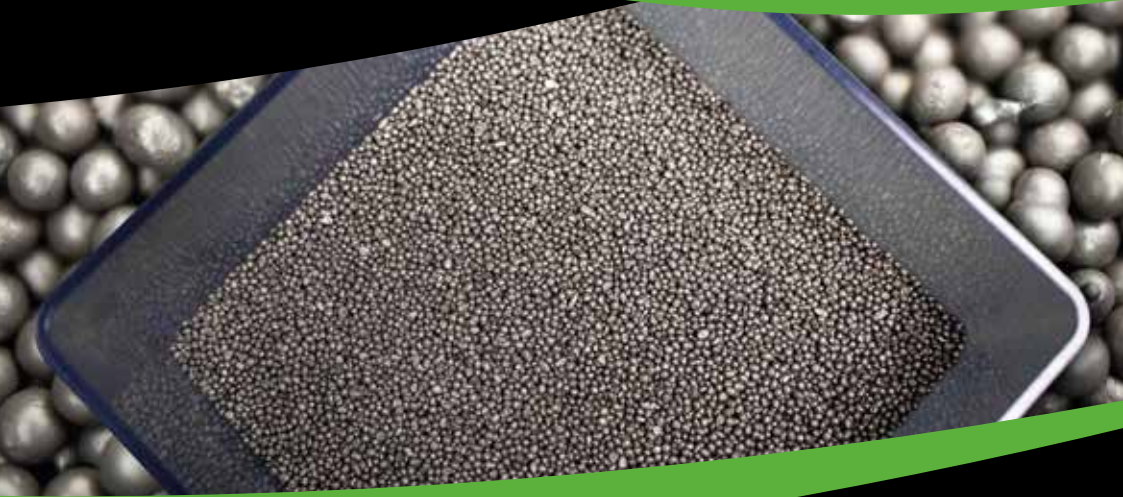

We can recycle any abrasives that we can supply (subject to their content).

How is the abrasive reused?

Spent abrasives are not recycled and used for their original purpose. They are recycled and used in different industries.

We Deliver Results Beyond The Surface

At SurfacePrep we appreciate that every customer is unique and that being the case their used materials are treated in the same way.

We take the time to fully understand the process, the material generated and potential applications for its reuse. Our aim is to ensure that we provide you with the most cost effective solution for each product collected.

Using in-house technology and third-party processing capabilities, we are able to offer tailor made recycled materials to support customers across a wide range of industry sectors.

What we need to know from you:

- Company name
- Trading/collection address
- Contact name and telephone number
- Material to be processed
- Who supplied the original material
- If the spent material is hazardous
