

SurfacePrep, in partnership with IMechE Argyll Ruane, delivers a comprehensive programme of training courses covering every critical stage of the surface finishing process, from blast cleaning and paint application to inspection and compliance.

These courses are designed to improve:

- Operator safety and awareness
- Process consistency and surface quality
- Equipment uptime and fault prevention
- Cost control through efficient media and energy use

Every session combines best-practice methodology with hands-on training to help your team get the most from your equipment. Our training is suitable for operators, supervisors, HSE officers, maintenance teams and inspectors, whether you're new to surface finishing or looking to upskill experienced staff.

- Delivered on-site or at our Sheffield training facility
- Certificate of Competence included
- Flexible modules tailored to your equipment and risk level

Flexible Training, On Your Terms

Courses can be delivered at our dedicated training facility in Sheffield, where we offer a state-of-the-art learning environment with full practical capabilities. Prefer to train on-site? We also deliver training at your location using either your own equipment or SurfacePrep loan units.

Our training advisors will help you choose the right course structure for your team, equipment and risk profile. Whether you're upskilling new operators or standardising best practice across multiple sites, we can tailor the syllabus to suit your operation.

- On-site or in-facility delivery
- Real-world practical training
- Bespoke course design available
